

## Ex – 1 - Initial

### Task:

1. Create the below plot (using Titanic dataset) and list 2 key insights from the graph.
2. Suggest changes that you can make to the graph.

### Learning Objective:

1. Creating complex visualization using simple R commands.
2. Exploring content outside of the course.
3. Understanding data and drawing insights.
4. Provide recommendations as Data Analysts.

Hint: Google `facet_grid()` function

### Instructions:

1. Be observant for the aesthetic expressions. It should replicate the graph exactly.
2. Type all your R commands in a single R script. Name your R script file in the following format: name as per record)\_wks2.
